

Oil and Gas Processing

stanleymachining.com

Stanley Machining has been a leading supplier for the Oil and Gas industry for over 35 years. The world's largest oil producing companies have trusted Stanley Machining to produce products for their most mission critical applications. In addition to our state-of-the-art machining and inspection equipment, Stanley Machining offers in-house secondary operations, including gun drilling and cladding. From small to large format CNC machining capabilities, we offer experience for a variety of applications including:

- Hydraulic Fracturing
- Horizontal Fracking
- Subsea and Surface
- Downhole Drilling

Stanley Machining is committed to continuous improvement and reinvesting in our equipment and our people. We are passionate about providing our customers of all industries our turnkey expertise in manufacturing solutions. We are dedicated to advocating for the continual growth and strength of both the Oil and Gas industry and manufacturing as a whole by participating in the following: The National Association of Manufacturers (NAM), the US Oil and Gas Association, the Technology and Manufacturing Association (TMA), and the Precision Machined Parts Association (PMPA).
